BUSINESS MANAGEMENT
UC, Riverside

Volunteer Work

2018 - PRESENT | GIRLS WHO CODE
Club Facilitator

2018 - PRESENT | MAKE-A-WISH
Photographer

Relevant Experience

JANUARY 2020 - PRESENT

PROJECT MANAGER

SMASHTECH | San Diego, CA

Providing leadership and direction to project teams, I focus on delivering high-quality products and services within committed time frames across a wide range of digital needs.

- Accurately coordinate resources, tasks, and dependencies creating timelines and setting project schedules allowing teams to meet key project milestones
- Partner with team leads and project stakeholders to set and document expectations, deliverables, and objectives creating goal-oriented project plans
- Track progress throughout project lifecycles, resolving conflicts and optimizing gains, keeping stakeholders informed of project status
- Run Quality Assurance on digital projects, documenting bugs, project requirement discrepancies, and disseminating resolutions
- Draft technical requirements documentation and creative briefs communicating project objectives and goals

AUGUST 2016 - JANUARY 2020

WEB ENGINEER / TEAM LEAD

FIFTY AND FIFTY | San Diego, CA

Collaborating with Strategist, Copywriters, and Designers, I translated visual comps into rich web interactions that were fluidly responsive, performant, semantic, and accessible through hand-coding in front-end and back-end languages, building 25+ websites and microsites.

- Consulted with project stakeholders by leading discussions to identify web development solutions and technologies that would meet project requirements, enhance user experience, and support maintainability
- Evaluated design deliverables for build feasibility, providing constructive feedback to internal, client-side and third-party designers and project managers
- Drafted thorough documentation and guides for engineering maintainability and client usability
- Executed code reviews with engineering team to implement department standards and development best practices
- Performed cross-browser quality assurance testing, bug tracking and remediation for digital projects ensuring technical and creative requirements were met
- Collaborated with visual and user experience designers on wireframes and interactive prototypes, informing the technical direction of production-ready web experiences
- Developed, implemented, and oversaw company internship program and personal development program
